

## Earthing continuity achievable everywhere – ingeniously simple! Now new, with extra features – the **Universal Earthing Bridge!**

- ✓ With conductive contact caps (EPDM conductive)
- ✓ DEKRA EXAM certified electrostatically dissipative
- ✓ Weather-resistant
- ✓ Temperature-resistant
- ✓ Uncomplicated retro-fitting on site
- ✓ Simply & securely fitted
- ✓ Attractively priced alternative to earthing cables
- ✓ For universal use with all electrostatically dissipative JACOB surface finishes

Electrostatic potential equalisation is now incredibly easy. The earthing bridge is installed quickly and safely in just a few easy steps. Existing pipe systems can be retrofitted without the need for welding, since the earthing bridge fixes simply and easily to the JACOB pull-ring. Suitable for universal use with powder-coated, electrically conductive surfaces, with galvanized surfaces and stainless steel. Our DEKRA EXAM certified earthing bridge can also be supplied without contact caps, if required, for galvanized surfaces and stainless steel in particular.

***AUTHENTIC JACOB – Your key to current and future success!***
